

Yes/No Spread:

Directions:

1. Shuffle in your question and cut the cards.
2. In Stack One, turn over 13 cards or stop when you reach an Ace. (Ace of Wands, Cups, Swords, or Pentacles.)
3. Repeat step two, with Stacks Two and Three.
4. If you have three Aces, your answer is Yes. If you have one or two Aces, your answer is Maybe/Yes. If you ended up dealing 13 cards onto each stack and didn't pull an Ace, your answer is No.

*You can add clarifying cards to the stacks without an Ace in order to gain added clarity.
